DETAILED ACTION

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. The submitted IDS has been considered. A copy of applicant-submitted Form PTO1449 is enclosed.

83 3. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell et al(US005570287) or Hayase et al(US005387005) or Kaneko(US4948466).

Air suspension adjustment based upon acceleration or deceleration associated with the vehicle is conventional which involves comparison of one or more acceleration or deceleration signals.

4. JP8-132842 discloses acceleration responsive height adjustable air suspension.

5. In Shono et al US006298292), the continual adjustment of the air suspension is compensated for by a variety of parameters such as vehicle acceleration. This corresponds to one of the objects of the instant invention set forth on page 2, lines 1-4 of paragraph "[0005]".
